

## Quality Planting Materials of Litchi Available at ICAR-NRCL, Muzaffarpur

Litchi is one of the most delicious and sought-after fruits among the masses. To meet growing needs for the fruit, quality planting material of litchi is much in demand among growers throughout the country. Use of genuine true-to-type planting material is one of the most important factors for improved productivity and marketing in horticultural crops, especially in perennial fruit crops including litchi. With the aim to providing genuine quality planting material, ICAR-NRC on Litchi, Muzaffarpur maintains a modern nursery and produces a large number of planting material of different varieties of litchi. ICAR-NRCL conforms to ISO 2008:2015 certification and adheres to the best package of practices and management protocols to ensure that only genuine and high quality planting materials are made available to growers.
