

NRCL organized one day Training programme on "Innovative Post Harvest Processing Methods in Litchi"

ICAR-NRC on Litchi organised one day training on Innovative Post Harvest Methods in Litchi on 16th March 2023 for progressive farmers and entrepreneurs. The training was inaugurated by the Director, Dr. Bikash Das. He sensitised the farmers on the current scenario and future prospects of litchi cultivation. This was followed by field visit, where farmers were briefed on the basic techniques of pruning and rejuvenation. In the succeeding session of the training, Dr. Sunil Kumar, Scientist explained farmers about novel techniques in litchi cultivation. The forenoon session ended with session on Integrated Pest Management in Litchi by Dr. Vinod Kumar, Principal Scientist. This was followed by the session on processing and value addition in Litchi by Dr. Alamwati Pongener, Scientist, IARI, Assam. The valedictory Session marked farmers' interactive session with Director and Scientists of NRCL and distribution of bagging materials and conferring certificates. The programme was coordinated by Dr Sunil Kumar.
